

## **Year 11 into Level 3 Health and Social Care Transition work 2023**

### **BTEC Level 3 Extended Certificate in Health and Social Care**

If you are choosing Health and Social Care as one of your A-levels in sixth form, here is some work to help you with your start in September.

There are two units for year 12:

1. Human Lifespan Development
2. Working in Health and Social Care

#### **Unit 1 Human Lifespan Development**

This is an examination unit where the test will be sat in January 2024, it covers how an individual develops physically, intellectually, emotionally and socially. It also looks at different factors how they could impact an individual's development and the effects of ageing.

For this task please create a factsheet for each of the life stages that outlines the different physical, intellectual, emotional and social changes that individual would experience.

#### **Unit 5 Working in Health and Social Care**

This is an internally assessed unit that requires your ability to apply your knowledge to case studies whilst conducting your own research to supplement the learning in the classroom.

For this task please can you research and provide a written piece of work that describes the following:

- Equality in Health and Social Care
- Preventing discrimination in Health and Social Care
- The 6Cs in Health and Social Care

**Please bring these with you to your first lesson in September.**
